Extra-curricular Projects

- Built and manage my own personal e-mail server (*Postfix, Dovecot, SpamAssassin, MariaDB, Nginx, Docker*)
- Operated & managed what was probably one of the largest Minecraft game servers at the time. (*Java, Minecraft, Bash Scripts, Cron, Systemd, MySQL, Python, Eclipse, Jenkins*)
- Deployed multiple websites for personal usage: Minecraft community websites, file servers, webmail, administration consoles, etc, etc. (*Nginx, Apache2, MySQL, SSL, LetsEncrypt, Python, PHP, docker, etc*)
- Host and Manage a TeamSpeak server for personal and Minecraft community communication. (*TeamSpeak, Bash Scripts, Systemd*)
- Use Syncthing for a personal distributed “server-less” backup solution. (*Syncthing, Systemd, Nginx*)
- Developed personal scripts for automated incremental and de-duplicated backups of all services hosted on my Linux boxes. (*Python, Bash Scripts, Cron, rsync*)
- Set up, hosted and managed various other game servers, for personal & friends’ usage. (*Factorio, Minecraft, Terraria, OpenTTD, Counter Strike: Source, Team Fortress*)
- Configured transparent caching Squid proxy for during the period when my family had very, very appalling internet speeds. (*Squid, DHCP, DD-WRT, MikroTik*)
- Handle a large portion of all technical responsibilities at my local church. This involves making sure all technical equipment is set up correctly for live services, users know how to use the equipment correctly, and running lighting & multimedia during live services.

Other Personal Interests

- I am a licensed HAM operator. (KG7WKU) Although I am not active in many of the activities people usually associate with ham radio, I do enjoy experimenting with various forms of wireless communications that being licensed allows.
- I enjoy flying multirotor quadcopters. (“drones”) I have a 450-sized quad, built from scratch, which I fly around on my family’s farm, and have a lot of fun doing so.
- I am a self-professed data hoarder.
- Additionally, I enjoy water skiing, and especially snow skiing.
- I like tacos.
- I enjoy explaining and discussing advanced technical ideas, concepts, and implications with friends and co-workers.
